Meeting Summary for CTU-UCCS CAE Collaboration, 14 July 2014
Attending were Dr. Edward Chow (chair) and Dr. Chuan Yue from UCCS; Dr. Bruce Harmon and Dr. Yanzhen Qu (chair) from CTU; Dr. Kelly Hughes from NSA

This summary is provided by Dr. Hughes as follows:

I want to take the opportunity to thank everyone for what I thought was a very productive visit. It was a pleasure to meet everyone and start the process of moving forward and improving relationships and opportunities. Items mentioned for areas of collaboration are:

- Inviting each other to dissertation defenses
- Presenting during a class or exchanging faculty for a semester/quarter
- Continued collaboration on outreach programs
- Look for areas where collaboration could be conducted for research

For each school, we had an opportunity to review questions on the CAE application. If you have any outstanding or new questions, please let me know.

We also discussed opportunities here at the agency for research projects, student interns and jobs. If you are aware of a student that has applied, please let me know so I can reach out to hiring managers to let them know and have the specifically look for that student. When you have time, please forward to me a list of research areas that I can investigate to see if we have projects that might benefit from your research.

I had a meeting with the SEALs from the other CAE Front Range schools. One item mentioned as a way to work together was to restart the FRISC conference. I will continue to reach out to the other SEALs and see if that cannot be accomplished. Many hands make light work. If you or another faculty member would like to participate in organizing future FRISC or other conferences, please let me know.

Again, I want to thank everyone for their time. Please do not hesitate to contact me if you have any questions or concerns.

Thank you,

Kelly
