TestOut Lab Login Information

2. On the left side of the screen, use the login information that you received in your student e-mail account from the Words of Wisdom (WOW) Bookstore.
   *If you did not receive the e-mail or have questions about the login information, you can contact WOW at 877-288-7650 or via e-mail at ctuonlinebooks@wordsofwisdombooks.com.*

3. Under the “My School” tab, you should see your course and be able to select the product that corresponds to that course. If you do not have the course available to select, please review the instructions in the e-mail from WOW.

4. Select the “Table of Contents” icon in the header on the page to select what is instructed to be completed in your assignment details.

5. You will need to review your assignment details for specific instructions for what needs to be completed.

6. Once you select the section you need to complete, the system will give you some information about what you will learn, and you will want to click the “Start Lab” button.
7. A new tab will appear in your browser, and you should see the instructions to complete the lab under the “Scenario” heading. Use the “Workspace” and other parts of the screen to complete your lab instructions. Be aware that if you close your browser, you might lose your progress.

8. After completing the lab, click the “Done” button in the upper-right corner of the screen, and you should see a report similar to the one below indicating your pass status. Your instructor may ask you to take a screenshot of the following report. Be sure to review your live or archived chat to know what your instructor expects to be submitted.
